

Pizza PM

is a conceptual pizza cafe that is a combination of conventional New York-style pizza joint and upscale bar which serves pizza and drinks during the evening and late night hours.

The evening blues and midnight purples used in the app screens along with the pink, blue, and purple gradients in the icons capture the late night atmosphere of Pizza PM and give the branding a retro look, reminiscent of the neon colors of the 1980s.

The app first displays a splash screen with the logotype, then goes to a home screen where a user can view the menu, make an order a variety of ways, or view their profile and recent orders.
